SUMMARY

Recent computer science graduate eager to start a career in software development. Known for being organized, reliable, and ready to learn in any setting. Looking for an entry-level role that offers growth while helping the team achieve its goals.

SKILLS

- Full stack web development
- Java
- Spring Boot
- Python
- Django
- HTML5
- CSS3
- Java Script
- React
- MySQL

WORK EXPERIENCE

Software Development Intern
Kodnest Technologies

15 Sep 2025 – 01 Apr 2026

- Gained practical experience as an Intern at KodNest, utilizing Java, MySQL, Frontend Technology, and Python on real-world projects. Worked closely with industry experts, developing strong coding skills, understanding software development practices, and improving collaboration and communication abilities.

Programmer Analyst Trainee
Cognizant

01 May 2022 – 08 Sep 2023

- Deployed and configured Azure Virtual Machines, storage accounts, and networking components to support web application hosting and cloud operations. Assisted in deploying a web application on Azure and contributed to setting up continuous integration and continuous deployment (CI/CD) pipelines using Azure DevOps for automated build and release processes.

PROJECTS

Salessavy

Developed a modular e-commerce platform using Java, Spring Boot, and REST APIs, implementing six independent services for Authentication, User Management, Product, Cart, Order, and Payment, ensuring scalability and robust service separation. Integrated Razorpay payment gateway and utilized MySQL for efficient data management.

Foodizo

Created Foodizo, a full-stack platform connecting users to neighborhood restaurants. Built and maintained backend functionalities with Django, implemented data models, and ensured the development of secure APIs, while designing a responsive frontend using HTML, CSS, and JavaScript for optimal user experience.
